

## Sign-in page

Users would need to use their netlink ID and credentials to sign. After clicking the “Sign in with brightspace” button, users would be directed to Brightspace for login.

## Home Page

After the login, the user is directed to the home page.

On the home page, it shows users' planned sessions and completed sessions. For planned sessions, the user is able to click the "View details" button to see about the details of the scheduled session and update them if needed. The user can also view the navigation route from the user's current location to the destination. The user can also choose different destinations for navigation on the settings page.

Great study space  
especially for group study  
sessions!

## Reservation page

Clicking the “Reserve” button to move to the reservation page

On the reservation page, it shows available workplaces by building availability and rating for each workplace. However, the order of display available workplaces can be changed through the workplace preferences in the Settings page. The search function allows users to input specific building or individual room names.

Users can click on the “Plus” button or “Reserve now” to reserve a workplace. Users need to input workplace, data and time to create a reservation. Equipment section will be displayed once a workplace is selected. Seats and description sections are optional.
